

When *IT* really matters

## Do you have 24x7x365 support?

She's supporting England...

... but who's supporting the servers?

EC Computers, as part of their flexible support, provide server and key PC monitoring to ensure that your system is kept running in optimum condition. Do you know if...

.. you backup is actually backing up data, the correct data?  
What happens if this fails?

.. you server that is running fault tolerant Hard Disks, what happens if any of these fail, do you know?

If you had EC Monitoring & managed support we will know and only if you need to know, will you know, but if the worst happens - Your data is safe; "Simples"
